

Balaji Points

Master Enterprise Rebuild & Premium UI Guide

This master document defines the complete enterprise rebuild architecture for the Balaji Points ecosystem, including premium UI/UX standards, animation system, theme architecture, authentication system, multi-store scalability, realtime synchronization, Firebase enterprise architecture, and modern Flutter product standards.

1. Product Direction

- Premium enterprise rewards ecosystem.
- Modern fintech-inspired loyalty experience.
- Realtime multi-store reward platform.
- International-level Flutter product quality.
- Smooth and lightweight premium UI.

2. Animation System Standards

- Use lightweight premium animations only.
- Avoid heavy flashy animations.
- Use subtle micro interactions.
- Focus on smooth enterprise feel.
- Use animations to improve perceived performance.

3. Recommended Animation Packages

- lottie
- flutter_animate
- animations
- rive (optional for premium widgets)

4. Recommended Lottie Usage

- Splash screen animation.
- Reward success animation.

- Bill upload success.
- Empty states.
- Loading placeholders.
- Notification success states.

5. Animation Rules

- Animation duration should remain between 200ms–600ms.
- Use fade and slide transitions primarily.
- Avoid excessive scaling animations.
- Avoid continuous heavy looping animations.
- Use premium smooth easing curves.

6. Premium Motion Design

- Fade In for cards.
- Slide Up for dashboard widgets.
- Soft button press animations.
- Smooth bottom navigation transitions.
- Hero transitions for wallet and rewards.

7. Light & Dark Theme Architecture

- Full app support for light and dark mode.
- Theme switching using centralized theme provider.
- Adaptive colors based on system theme.
- Premium dark mode contrast balancing.
- Consistent spacing and typography in both themes.

8. Light Theme Design

- Premium soft background colors.
- Minimal clean white surfaces.
- Controlled navy blue usage.
- Subtle premium shadows.

- Readable typography hierarchy.

9. Dark Theme Design

- Use deep charcoal backgrounds.
- Avoid pure black backgrounds.
- Use soft dark cards.
- Reduce eye strain with muted text.
- Premium modern fintech feel.

10. Font System

- Primary Font: Plus Jakarta Sans
- Secondary Font: Outfit
- Numeric Font: Satoshi
- Consistent typography scaling.
- Centralized text style system.

11. Final Light Theme Colors

- Primary: #1D2B6B
- Secondary: #C96B7B
- Background: #F8F9FB
- Surface: #FFFFFF
- Soft Surface: #F2F4F7
- Border: #E4E7EC
- Text Primary: #101828
- Text Secondary: #667085

12. Final Dark Theme Colors

- Primary Dark: #2D4AB8
- Secondary Dark: #D96A87
- Background Dark: #0F1115
- Card Dark: #171A22

- Surface Dark: #232733
- Border Dark: #313543
- Text Primary Dark: #FFFFFF
- Text Secondary Dark: #A0A8B8

13. Reward Tier Colors

- Silver: #B8BDC7
- Gold: #D4A537
- Platinum: #8E9AAF
- Diamond: #5CC8FF

14. Border Radius System

- Buttons Radius: 14
- Cards Radius: 24
- Wallet Cards Radius: 28
- Inputs Radius: 18
- Bottom Navigation Radius: 30

15. Shadow System

- Use soft premium shadows only.
- Low opacity shadow architecture.
- Avoid neumorphic heavy shadows.
- Blur Radius: 16
- Soft elevation hierarchy.

16. App Spacing Standards

- Screen Padding: 20
- Section Gap: 24
- Card Padding: 18
- Button Height: 54
- Input Height: 56

17. Authentication Architecture

- Mobile Number + 4 Digit PIN login.
- Remember Me support.
- Trusted device sessions.
- Fingerprint and Face ID support.
- Biometric fallback to PIN.

18. Multi-Store Architecture

- Super Admin creates stores.
- Store Admin manages assigned branches.
- Carpenters linked to branches.
- Branch-based reward system.
- Scalable SaaS architecture.

19. State Management Architecture

- Use Riverpod only.
- Feature-first architecture.
- AsyncNotifier providers.
- Offline-first cache support.
- Clean architecture separation.

20. Instant Loading Strategy

- Cache-first dashboard loading.
- Shimmer loading states.
- Preload dashboard during splash.
- Cached network images.
- Pagination architecture.

21. Instant Reward Synchronization

- Realtime Firestore streams.
- Cloud Functions reward processing.

- Realtime wallet updates.
- Transaction-safe point updates.
- Realtime admin dashboard sync.

22. Firebase Enterprise Stack

- Firebase Authentication
- Cloud Firestore
- Firebase Messaging
- Firebase Storage
- Firebase Analytics
- Firebase Crashlytics
- Firebase Remote Config
- Cloud Functions

23. Recommended Flutter Packages

- flutter_riverpod
- go_router
- local_auth
- flutter_secure_storage
- lottie
- flutter_animate
- cached_network_image
- shimmer
- firebase_core
- cloud_firestore
- firebase_auth

24. Design System Files

- app_colors.dart
- app_typography.dart
- app_spacing.dart

- app_radius.dart
- app_shadows.dart
- app_theme.dart
- app_navigation.dart

25. Rebuild Roadmap

- Phase 1: Architecture cleanup.
- Phase 2: Theme and UI redesign.
- Phase 3: Multi-store system.
- Phase 4: Analytics and web dashboard.
- Phase 5: SaaS platform scaling.

Final Recommendation:

Balaji Points should follow a premium minimal enterprise design language inspired by modern fintech, SaaS, and rewards platforms. The application should focus on smooth performance, lightweight premium animations, dark/light theme consistency, clean typography, realtime synchronization, and scalable Flutter architecture.
